

## Kanex iAdapt<sup>®</sup> HDMI V2

### MDP to HDMI with Audio Support and 1080p Video

#### Port Connectors

Mini DisplayPort

HDMI

Mini DisplayPort is a miniaturized version of DisplayPort technology commonly found on Apple computers. The latest Mac models are equipped with Mini DisplayPort connectors that can now support both video and audio output. The iAdapt HDMI V2 has been engineered to support full 1080p HD video output and audio to a single HDMI cable.

Kanex iAdapt HDMI V2 will allow you to connect a Mini DisplayPort equipped Apple computer to any HDMI enabled external display such as an HD projector, monitor, or HDTV. Connect with iAdapt HDMI V2 to extend your Mac desktop onto a secondary display or use it in mirror mode for presentation and viewing purposes. With a sleek design and user-friendly functionality, this adapter will meet every connectivity need and expectation.

#### Features

- Exclusively designed for Apple MacBook, MacBook Pro, MacBook Air, Mac Mini, and iMac with a Mini DisplayPort connector
- Supports audio and video passthrough for April 2010 MacBook / April 2010 MacBook Pro and all 21.5-inch and 27-inch iMac desktop computers
- Converts video signal from Mini DisplayPort to HDMI format for use with HD monitors, projectors, and HDTVs
- Display video in full 1080p HD for highest quality resolution on any HDMI enabled device
- Supports video passthrough for all Mac models with a Mini DisplayPort connector
- Simple design allows for a single cable solution for HDMI connectivity
